Information on healthy aging and prevention of disease will be available on the Occupational Medicine Web site (access Netscape Navigator or Internet Explorer, a) <http://SGS>, b) then choose **Occupational Medicine**, c) scroll down to desired health packet, and at all medical facilities and upon request to Carol Roth, email Roth-1, Carol, 867-3414. NUTRITION TIP OF THE WEEK FROM THE KSC FITNESS CENTERS: Can't seem to stay motivated to lose weight and stay active? Here's another reason to step on that treadmill—by doing so, you are working to keep diabetes type 2 at bay. A new study suggests that even minor lifestyle changes can reduce your chances of developing this condition. Diabetes is "the main cause of kidney failure, limb amputations, and new onset blindness in adults and a major cause of heart disease and stroke." "So many of our health problems can be avoided through diet, exercise and making sure we take care of ourselves. By promoting healthy lifestyles, we can improve the quality of life for all Americans, and reduce health care costs dramatically." Furthermore, "Every year a person can live free of diabetes means an added year of life free of pain, disability and medical costs incurred by this disease," says Allen Spiegel, director of the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK). (TA-C2)

Although emphasis is placed on major procurement fraud, (particularly allegations of defective/substandard parts, mischarging, kickbacks, bid rigging, and research fraud), investigations are also conducted of theft, conflict of interest, environmental and hazardous waste violations, health care fraud, and computer related crimes. OCI also provides fraud briefings for Government and contractor employees that are designed to highlight potential risks concerning fraud and related matters. Suspected violations can be reported by calling 867-4714 locally, the toll free Hotline at 1-800-424-9183, or by writing NASA Inspector General, P. O.
